

What is claimed is:

1. An apparatus for mounting on a shopping cart, comprising:
 - a clamping device;
 - a bracket connected to the clamping device; and
 - a panel connected to the bracket.
2. The apparatus according to claim 1, further including a clip connected to the panel.
3. The apparatus according to claim 2, wherein the clip has a hinge.
4. The apparatus according to claim 2, further including a lever rotatably connected to the hinge.
5. The apparatus according to claim 1, wherein the panel has a planar upper surface.
6. The apparatus according to claim 1, wherein the clamping device has a living hinge.
7. The apparatus according to claim 1, wherein the clamping device has a user-adjusting means of attachment.
8. The apparatus according to claim 7, wherein the user-adjusting means of attachment includes a layer of padding.
9. The apparatus according to claim 1, wherein the clamping device has a friction increasing means of attachment.
10. The apparatus according to claim 1, wherein the panel includes at least one device selected from the group of devices consisting of a calculator, a computing device, a monitor and a coupon printer.
11. The apparatus according to claim 1, wherein a longer axis of the panel is parallel to the horizontal.

12. The apparatus according to claim 11, further including a first spring-hinged clip fastened on one side of the panel and a second spring-hinged clip fastened on another side of the panel.
